

## 36 inch built-in Bottom Mount Refrigerator with ice maker, panel ready Heritage Series

\$ 8,499

### REF36BMBIPRT

Bertazzoni built-in refrigerators are designed, engineered and made in Italy with the highest grade materials and components. The proprietary 'lift & swing' door hinge system makes them the ideal choice for true flush installation as a single unit or side-by-side. These refrigerators integrate seamlessly with all other Bertazzoni appliances into style-harmonized suites for a true, high-performing kitchen.

These built-in refrigerators are built to last, employing metal and glass inside and out for better temperature management. The lateral airflow system, with dual compressor and evaporator for refrigerator and freezer, reduces cold air loss when opening doors and allows for category-leading interior depth. The internal configuration is designed for maximum flexibility, with 15 cubic feet of refrigerator volume and 4.6 cubic feet of FlexMode volume. The FlexMode Refrigerator-Freezer allows to switch the bottom compartment between freezer, fresco and refrigerator with one touch. Interior LED lighting on top and sides provide bright interior illumination on all levels with minimal energy consumption. Integrated water filter connected to water line ensures regular production of clean ice cubes of customizable size. Replacement water filters are available for purchase [here](#).

To mount a Bertazzoni handle kit on a custom kitchen cabinet panel; use brass threaded inserts available for purchase [here](#).

Using one of the 3 available handle kits in Professional, Master and Heritage Series style, this refrigerator integrates seamlessly with all other Bertazzoni appliances into style-harmonized suites for a true, high-performing kitchen.

Handle kits are sold separately.

This product is covered by a 2 years parts and labor warranty and 5 years warranty for the entire sealed system.

See predecessor model [here](#).
